

Description

The battery monitor is specifically designed to monitor individual battery voltage in a four (4) battery string configuration. Used with the TELSEC® 1500/2000, the battery monitor will provide accurate readings of the individual batteries in a 4 battery string to the nearest hundredth of a volt. By monitoring the individual batteries, the TELSEC system can log the battery voltage, alarm based upon high or low voltage and if the voltage differential between batteries in the string is greater than a user defined limit.

Specifications

Part Number: 350054

Mounting Options: refer to installation instruction document: i350054 REV 1.4 06/17/03

Accuracy: $\pm .01$ vdc

Calibration: factory calibrated; can be fine tuned in the field.

Size: 2 3/4" X 5 1/2" x 5/8" (70mm x 140mm x 16mm)

Shipping Weight: 1 lb (454g)

Warranty: One (1) year
